To whom it may concern,

I am pleased to write this letter of recommendation for Mr. Iago Alonso Alonso, who worked for me as a software engineer from December 1st 2016 to November 30th 2018. His responsibilities included analysis, design and implementation of complex desktop-based and web-based applications using a variety of technologies (e.g., PostgreSQL and PostGIS, Java, gvSIG, OpenJUMP, JasperReport, Hibernate, Spring, REST services, JavaScript, HTML, CSS, Angular, and many others).

During the course of his employment, Iago was a dependable employee and a hard worker with solid problem solving and technical skills and the ability to complete the work assigned to him on time. Iago also did an excellent job in staying up to date on software developments and thus finding new solutions. He takes his work very seriously and he tries to stay abreast of the newest developments in software engineering by learning new techniques and technologies on his own. Although Iago is a fast-learner, he is very careful and cautious about his work.

Overall, Iago is a talented, hard-working employee and he would be an asset to have on any team. A reliable and highly capable employee, I can't recommend him highly enough.

Sincerely,

A Coruña, November 26th 2018

Dr. Miguel Ángel Rodríguez Luaces

Associate Professor of Languages and Computer Systems, University of A Coruña
